Summary

Driven professional seeking opportunities in the field of software development. Proficient with Windows Software, including, but not limited to, Visual Studio, Microsoft SQL and WSL. Prioritize learning, developing, and contributing within an organization. Able to adapt to various environments with people of different backgrounds. After a few years of being in the field of accounting and finance, there was a need to diversify my skillset. That is when I began researching, and found Nashville Software School and their Bootcamp programs.
