Zoom | Slack

TECHNICAL EXPERIENCE

Full Stack Software Developer
Nashville Software School
NSS is a six-month intensive, full-time software development bootcamp focusing on HTML, CSS, Javascript, React and server-side fundamentals with Python and Django.
- Single-page application development with React and with a focus on modern ES6+ Javascript features and modular code
- Version controlled individual and group projects with Git and Github
- Project management with issue tickets and Github Projects
- Database planning by building entity relationship diagrams to define relationships with an emphasis on maintaining a flat data structure
- Server-side, test-driven development with Python, Django, and SQL

PROFESSIONAL EXPERIENCE

Transmissions Systems Operator
U.S. Marine Corps | Sep. 2016 to Sep. 2020
- Instructed and mentored 20+ subordinates on a daily basis, improving their technical skills
- Installed, operated, and maintained communications assets
- Planned, coordinated, executed operations in order to enable command and control
- Accounted for over $1,000,000 of communications equipment

PERSONAL PROJECTS

- **Strain Brain -** *https://github.com/TheTechTravis/strain-brain*

  Strain Brain is a resource that allows medical marijuana patients to research and find strains that have the medical effects that they are seeking, so that they can make informed decisions when purchasing from their local dispensary.

  - Sole contributor for the entirety of the planning, implementation, and documentation
  - Interacts and consumes data from a third-party API
  - Utilizes React state and persistent data storage

GROUP PROJECTS

- **Nutshell -** *https://github.com/nss-day-cohort-44/nutshell-sun-satyrs*

  Nutshell is a dashboard for people to organize their daily tasks, events, news articles, friends, and chat messages all in one convenient place.

  - Primarily responsible for messaging system and user authentication
  - Assisted in the entirety of planning (wireframe and entity relationship diagram) as well as pair-programming of other components
  - HTML/CSS/JavaScript
  - Custom event-driven development

- **Holiday Road -** *https://github.com/nss-day-cohort-44/holiday-road-white-sands*

  Holiday Road is a web application that allows people to build itineraries for their trips to the beautiful national parks of the United States.

  - Primarily responsible for the Eateries API functionality and all components which utilize it
  - Assisted in the entirety of planning (wireframe and entity relationship diagram) as well as pair-programming of other components
  - Custom event-driven development
