Software Experience

Software Developer
Nashvile Software School | Sep 2020 - Present

Intensive, hands-on, six month full-stack software development program creating applications both individually and in team-based agile environments using modern technologies.

- Fundamentals of HTML, CSS, JS/React, & Python/Django
- Used Git/Github to work collaboratively with teams on group projects in agile environment
- Built single page applications using React and ES6, styled with CS3 and Bootstrap-React
- Course was held entirely remotely using Zoom and Slack daily to communicate

Professional Experience

Co-founder & Head of Copywriting
Maestro (formerly Airwork) | Oct 2018 - Aug 2020

Early-stage startup designed to connect working professionals looking to work on independent projects with startups.

- Acted as product manager for building the app from the ground up with designers, developers, and marketing to build, shape, and evolve the brand
- Defined content strategy and team-wide sprints while running virtual meetings

Researcher
Sideman & Bancroft LLP | Mar 2018 - Oct 2019

- Searched online for trademark and copyright infringements against client's intellectual property
- Performed test buys of suspected counterfeit items and tested them to confirm authenticity
- wrote monthly reports to clients to detail my findings, which were used to take legal action when necessary

Advertising Director
KDNK Public Radio | Jan 2016 - Dec 2017

- Managed all advertising sales and accounts
- Wrote, produced, and scheduled all on-air and digital advertising
- Clients included Xcel Energy, The Aspen Institute, The City of Aspen, and The Aspen Airport

Managing Editor
Cooper Point Journal | Sep 2010 - Sep 2014

- Promoted from Letters and Opinions Editor in 2012
- Supervised section editors and lead weekly meetings
- Wrote articles, columns, and all headlines

Profile

Before embarking on my journey as a software developer I was a copywriter for 10 years, where I worked both in and out of tech. While I love writing, I didn't find myself being challenged enough in my career. I knew from working with engineers that software development would provide that challenge, so I made the switch!

Skills

- HTML
- CSS
- JavaScript
- ReactJS
- React-Bootstrap
- JSON
- Python
- Django
- SQL
- Git
- Github
- Figma

Personal Projects

Anorak   github.com/Anorak

Anorak is a resource for whiskey drinkers which allows them to search for and compare whiskeys they enjoy to others with a similar flavor profile.

- Single-page app has full CRUD functionality and was created utilizing React, React Router, and API fetch calls to JSON server
- Styling was achieved through CSS, and React Bootstrap to create a simple, user-friendly experience
- Data is unique to each user

Education

Nashville Software School
Certificate, Software Development

Evergreen State College
BA, Journalism & English
